(30) The Citizens' (Owners') Rights Overview

This document provides a quick reference overview of the 39 standardized Rights (with short descriptions).

Operational Note: Users must review the "Disclaimer" (Document 53) [REF:D53] regarding operational risk assessments and liability before deployment.

Rights Classification Labels

TCORF Rights are labeled using two categories to improve clarity and adoption:

- **[AUDIT EFFECT]**: The Right is tested by what the Organization publishes and by how it handles a request: intake, registration, routing, preservation. The Owner records the result. The Right does not stop the action it describes.
- **[STOP CONDITION]** Everything under [AUDIT EFFECT], and in addition the Right's failure criteria name the act itself, not only the handling of a request.

Both categories are audit benchmarks, not legal entitlements. In an Active Audit, any real-world request must be grounded in applicable law, policy, contract, or stakeholder obligations—not in TCORF text alone.

Why these 39

Each Right is built against a specific way an Owner can lose something — mostly a documented mechanism, some a structural asymmetry, a few anticipatory. Many more were considered and dropped. Some below will not match anything in your experience; that is expected, and not a sign the list is arbitrary. Where a Right surprises you, read its full entry in Document 31 and look for the mechanism before accepting or rejecting it.
Selection method: Document 10, Section 3 and Section 4.

Accountable Entity (Relationship) table

This table is provided for orientation. Document 31 [REF:D31] is the authoritative source for scope; Category IDs are reproduced here for reference only.

Category ID	**Category**	**Definition / Scope / ID references**	**International Equivalent examples**
CAT-NAT-GOV	National Government	the central executive, legislative and sovereign bodies of a country, and the national agencies and authorities acting under them	State, Federation, Country, Tax Authority.
CAT-REG-AUTH	Regional Authority	Intermediate governance levels responsible for a territory within a country	Province, Canton, Land, County.
CAT-LOCAL-GOV	Local Government	Governance at the most immediate level of residence	Town, City, Village, Municipality.
CAT-SECURITY	Law Enforcement & Security	Public safety and security institutions (public or private)	Police, Military, Intelligence, Private Security.
CAT-PUBLIC-SVC	Public Service Providers	Organizations managing essential infrastructure and services	Waterworks, Energy Providers, Schools.
CAT-MONOPOLY	Monopolies	Entities (state or private) with dominant market share in essential sectors, for a single Owner perspective even an HOA can be considered as monopoly	Utility Monopolies, Dominant Banks, HOA.
CAT-NON-BUS	Non-Business Entities	Organizations that influence public life but are not primary service providers	NGOs, Political Parties, Religious Institutions.
CAT-BUSINESS	Business Entities	Private-sector organizations	Business Entities
CAT-ALL-STATE	All State-Related Organizations	Includes at least these IDs: CAT-ALL-STATE, CAT-NAT-GOV, CAT-REG-AUTH, CAT-LOCAL-GOV, CAT-SECURITY. Also includes any entity otherwise classified under CAT-PUBLIC-SVC, CAT-MONOPOLY, CAT-BUSINESS or CAT-NON-BUS that is state-owned, state-controlled, or primarily publicly funded for its operations.	Public Sector, The State.

Table of Contents

Category 1: Foundational Governance **5**

1. Treat Every Citizen as an Owner [STOP CONDITION] 5
2. Right to Non-Violent Speech [STOP CONDITION] 5
3. Open Access to All Laws [STOP CONDITION] 5

Category 2: Vital Protections **6**

4. Protect Lives from Immediate Threats [AUDIT EFFECT] 6
5. Defense Against Systemic State Overreach [STOP CONDITION] 6
6. Guaranteed Basic Need [AUDIT EFFECT] 6

Category 3: Citizenship & Migration Control **7**

7. Protection of Citizenship Status [STOP CONDITION] 7
8. Publish All Immigration Statistics [AUDIT EFFECT] 7
9. Set Voting Rules for New Citizens [AUDIT EFFECT] 7
10. Authorization of Visa, Permit and Citizenship Criteria [AUDIT EFFECT] 7

Category 4: Mandate Authorization **8**

11. Voter Approval for Constitution [STOP CONDITION] 8
12. Safeguard Against Mandate Drift [STOP CONDITION] 8
13. Quality Assurance for Public Votes [AUDIT EFFECT] 8

Category 5: Executive Accountability **9**

14. Limit Terms and Immunity for Leaders [AUDIT EFFECT] 9
15. Management Q&A Safeguard [AUDIT EFFECT] 9

Category 6: Systemic Transparency **10**

16. Spending and Contract Transparency Safeguard [AUDIT EFFECT] 10
17. Public Statistics Integrity Safeguard [STOP CONDITION] 10
18. Transparent Tax Impact Metric [AUDIT EFFECT] 10
19. Beneficial Ownership Transparency Safeguard [AUDIT EFFECT] 10
20. Right to Challenge Organizational Identity [STOP CONDITION] 10

Category 7: Environmental Integrity **11**

21. Public Pollution & Waste Data [AUDIT EFFECT] 11
22. Land Surface and Habitat Transparency Safeguard [AUDIT EFFECT] 11
23. Open Access to Global Warming-related Data [AUDIT EFFECT] 11
24. Supply Independence by Trade Distance [AUDIT EFFECT] 11

Category 8: Economic Risk Governance **12**

25. High-Risk Industry Insurance Safeguard [AUDIT EFFECT] 12
26. Monopoly Power Transparency Safeguard [AUDIT EFFECT] 12
27. Tariff Governance Safeguard [AUDIT EFFECT] 12
28. State Support for Foreign Loss Claims [STOP CONDITION] 12
29. The Right to Personal Bankruptcy [STOP CONDITION] 13
30. AI Displacement Readiness Safeguard [AUDIT EFFECT] 13

Category 9: State Structure & Security 14

31. Law Enforcement Identification & Eligibility Safeguard [AUDIT EFFECT] 14
32. Report Public Emergency Readiness [AUDIT EFFECT] 14
33. No Detention Without Dangerous Conduct [AUDIT EFFECT] 14
34. Safeguard Against Unjustified Surveillance [AUDIT EFFECT] 14
35. The Right to Surveillance Warnings [AUDIT EFFECT] 14
36. Safeguard Against Emergency Overreach [STOP CONDITION] 15
37. Right to Name the State Form [STOP CONDITION] 15
38. Voter Approval for Border Changes [AUDIT EFFECT] 15
39. Compensation Benchmark Transparency Safeguard [AUDIT EFFECT] 15

Category 1: Foundational Governance

1. Treat Every Citizen as an Owner [STOP CONDITION]

Citizens hold the primary ownership stake in all state-related organizations. Employees and elected officials act on the Organization's behalf and must treat every non-violent Owner with professional respect. An Owner's criticism or opinion takes priority over the sensibilities of any state organization or employee.

Relationship: All State-Related Organizations.

2. Right to Non-Violent Speech [STOP CONDITION]

Owners have the inherent right to express opinions or criticism through verbal, written, or digital channels, whether individually or in groups. No state employee or organization may suppress, monitor, or penalize an Owner for exercising non-violent expression.

Relationship: All State-Related Organizations.

3. Open Access to All Laws [STOP CONDITION]

Compliance cannot be expected if the rules are inaccessible. All current and proposed laws, decrees and regulations must be free, downloadable, searchable, and deposited in print. A rule that is not accessible under this standard is not established under it, and an Owner may refuse its applicability and record the refusal.

Relationship: National Government & Regional Authority & Local Government.

Category 2: Vital Protections

4. Protect Lives from Immediate Threats [AUDIT EFFECT]

Keeping Owners alive is the first obligation of the country, state or community. It prepares for danger that arrives, and it does not create danger of its own.

Relationship: National Government & Regional Authority & Local Government.

5. Defense Against Systemic State Overreach [STOP CONDITION]

An Owner's refusal is absolute where a state Organization they co-own, or its Agent, threatens their life, health, freedom of movement, or assets on the basis of identity, status, or non-violent activity. The Organization never held authority to do so, and no statute, decree, court ruling or emergency order can confer it. Such an order is unauthorized the moment it is made.

Relationship: National Government & Law Enforcement

6. Guaranteed Basic Need [AUDIT EFFECT]

The Organization already sets minimum conditions for the people it holds in custody, and for the people it accommodates under reception arrangements. Owners may require those standards to be published beside the conditions available to an Owner in need.

Relationship: National Government.

Category 3: Citizenship & Migration Control

7. Protection of Citizenship Status [STOP CONDITION]

Withdrawal of an Owner's citizenship is unauthorized where it leaves them stateless, or where the citizenship was acquired at birth; the Owner may refuse its applicability and record the refusal. Relinquishment obtained by organizational pressure is treated as withdrawal. Withdrawal from any other Owner requires 1 year's notice.

Relationship: National Government.

8. Publish All Immigration Statistics [AUDIT EFFECT]

Owners are entitled to regular, free, and independently audited statistics regarding immigration volumes, refugee status, and new citizenships. Data should include geographic distribution to ensure transparency in demographic shifts.

Relationship: National Government & Regional Authority.

9. Set Voting Rules for New Citizens [AUDIT EFFECT]

The right to vote and to hold state office may require four consecutive years of lawful residence in the country, applied equally however citizenship was acquired, including by descent and by birth abroad. Citizens who can already vote without ever having met this condition enter a seven-year pause from the date the condition takes effect, or until they meet it. Citizenship acquired before the age of majority through a parent's ordinary residence is not covered. Citizenship itself is not affected.

Relationship: National Government.

10. Authorization of Visa, Permit and Citizenship Criteria [AUDIT EFFECT]

The conditions for granting visas, work permits, protection status and new citizenships are terms of membership. Changes to them require authorization by the Owners in advance.

Relationship: National Government & Regional Authority

Category 4: Mandate Authorization

11. Voter Approval for Constitution [STOP CONDITION]

Any change to the constitution requires authorization by the Owners in advance, by public vote. A change made without it is unauthorized, and an Owner may refuse its applicability and record the refusal. Authorization obtained afterwards does not cure it.

Relationship: National Government.

12. Safeguard Against Mandate Drift [STOP CONDITION]

Elected management is authorized only for the programs presented in its election program, and appointed management only for what the authorizing mandate carries. A material investment or policy absent from that authorization is unauthorized, and an Owner may refuse its applicability and record the refusal.

Relationship: All State-Related Organizations & Monopolies & Non-Business Entities & Business Entities.

13. Quality Assurance for Public Votes [AUDIT EFFECT]

Owners may reserve acceptance of the result of any public vote until the conditions of the vote and the count records are published, and every quality assurance check is published and met.

Relationship: National Government & Regional Authority.

Category 5: Executive Accountability

14. Limit Terms and Immunity for Leaders [AUDIT EFFECT]

Leadership in state organizations is time-limited to prevent systemic corruption. Once the term limit is reached, individuals should serve a continuous four-year period without any legal immunity to ensure they remain accountable for their tenure.

Relationship: National Government & Regional Authority.

15. Management Q&A Safeguard [AUDIT EFFECT]

Management should regularly report live and in person, then take open questions from independent media, on the record, so information reaches Owners unfiltered by public relations.

Relationship: All State-Related Organizations & Monopolies.

Category 6: Systemic Transparency

16. Spending and Contract Transparency Safeguard [AUDIT EFFECT]

Owners may request disclosure of the Organization's activities and agreements — procurement, contracts, invoices and payments, financial obligations, projects, subsidiaries and outsourcing, transfers and grants, and personnel spend — and may audit what is published against the disclosure standard. Non-disclosure is recorded as a finding; it does not block any action, and disclosure creates no obligation to alter, cancel or justify any spending decision.

Relationship: All State-Related Organizations.

17. Public Statistics Integrity Safeguard [STOP CONDITION]

Owners may require the Organization to publish, as a recurring statistical release, the figures describing its own condition — such as population, debt and spending, assets, and taxes collected. Every monetary total is published alongside its value per resident, per citizen, per taxpayer and per citizen-taxpayer.

Relationship: National Government & Regional Authority

18. Transparent Tax Impact Metric [AUDIT EFFECT]

The objective is to provide Owners with a single, audited figure that represents the work-hour cost of the state's fiscal policy. By converting abstract percentages into a "work-hour ratio," Owners can immediately interpret the gap that taxes and social contributions open between the price of their work and their net salary.

Relationship: National Government & Regional Authority

19. Beneficial Ownership Transparency Safeguard [AUDIT EFFECT]

Owners may require the Organization to publish who ultimately owns the entities it contracts with, and the ownership interests held by its own Agents. An entity whose ultimate owners are not disclosed is recorded as such.

Relationship: All State-Related Organizations.

20. Right to Challenge Organizational Identity [STOP CONDITION]

No Owner may be subjected to retaliation, investigation or administrative penalty for publicly stating that an organization’s conduct departs from its stated values, name or declared purpose. This applies to non-business organizations, including NGOs, political parties and religious institutions, so that “false flags” and misleading adjectives are not insulated from comment.

Relationship: All State-Related Organizations & Non-Business Entities.

Category 7: Environmental Integrity

21. Public Pollution & Waste Data [AUDIT EFFECT]

Management should provide regular, independently verified reports on air, water, and soil quality. This includes detailed data on waste management, recycling rates, and hazardous materials.

Relationship: Regional Authority.

22. Land Surface and Habitat Transparency Safeguard [AUDIT EFFECT]

Owners may require the Organization to publish how its territory divides between surface classes and how each class changes from period to period — the share that is sealed, the share under vegetation and water, the share held by hazardous installations, and the share under each protected-area designation. Published for each reporting unit, not as a national average. This is a disclosure benchmark; it does not require any land-use decision to be taken, changed or reversed.

Relationship: National Government & Regional Authority & Local Government.

23. Open Access to Global Warming-related Data [AUDIT EFFECT]

Owners may require the Organization to publish, as a continuing measurement record, the environmental conditions of the places where Owners live — temperature of air, ground, sealed surfaces and water, together with precipitation, humidity and atmospheric integrity — measured daily at fixed, published locations, retained as a long series, and retrievable as measurements rather than as summaries.

Relationship: National Government & Regional Authority.

24. Supply Independence by Trade Distance [AUDIT EFFECT]

Owners may request disclosure of how far the goods they depend on have travelled, and of the levies already applied to them, so that dependence on distant supply is visible rather than assumed. This is a disclosure benchmark; it does not require any tax to be introduced, changed or removed.

Relationship: National Government.

Category 8: Economic Risk Governance

25. High-Risk Industry Insurance Safeguard [AUDIT EFFECT]

Owners may request disclosure of the insurance held for activities capable of catastrophic harm — the insurer, the limit, the phases covered, and the maximum-loss analysis the limit is set against. This is a disclosure benchmark; it does not require any activity to be insured, stopped or changed.

Relationship: National Government & All State-Related Organizations & Monopolies & Business Entities

26. Monopoly Power Transparency Safeguard [AUDIT EFFECT]

Where an Owner has no feasible alternative to a provider, its prices and terms are public power. Owners may request disclosure of its pricing groups, special arrangements, input costs, surplus and contracting chain, whatever its form. This is a disclosure benchmark; it sets no price.

Relationship: National Government & Monopolies

27. Tariff Governance Safeguard [AUDIT EFFECT]

This right covers two functions of tariff governance. (a) Stability audit: where an Organization applies tariff measures, Owners may verify that each is registered, fits a category published in advance, is announced in advance with a domestic impact analysis, and stays in place for a minimum period. (b) Proposal channel: Owners may submit a calibrated tariff proposal, or a non-binding objection to a premature reduction, in a standardized format. Neither function evaluates whether a tariff is correct or necessary.

Relationship: National Government.

28. State Support for Foreign Loss Claims [STOP CONDITION]

If a foreign entity causes death, injury, or material loss to an Owner on national territory, the Organization is obligated to register that loss and to represent and support affected Owners in pursuing compensation, handled as an insurance claim focused on life and property restoration. The Owner proves the loss, not the cause. Where the Organization takes exclusive representation, it may not settle, waive, or extinguish a registered claim without a published and funded distribution mechanism in place.

Relationship: National Government.

29. The Right to Personal Bankruptcy [STOP CONDITION]

An Owner may file for personal insolvency on conditions comparable to those available to a company. Where no such route exists, that absence is the finding.

Relationship: National Government.

30. AI Displacement Readiness Safeguard [AUDIT EFFECT]

Owners have the right to regular, independently audited reporting on AI-driven job displacement, and to proof of a funded absorption capacity large enough for the displacement that has been measured. This is a readiness benchmark, not a policy instrument.

Relationship: National Government.

Category 9: State Structure & Security

31. Law Enforcement Identification & Eligibility Safeguard [AUDIT EFFECT]

Personnel authorized to use force domestically should be identifiable at the point of interaction, and the origin and eligibility of that force published. This is a disclosure benchmark, not a refusal right.

Relationship: National Government & Regional Authority & Local Government & Law Enforcement & Security.

32. Report Public Emergency Readiness [AUDIT EFFECT]

The state should publish annual reports regarding its readiness for emergencies, including resource capacity and reaction times for natural disasters, industrial accidents, and infrastructure failures.

Relationship: National Government & Regional Authority & Local Government.

33. No Detention Without Dangerous Conduct [AUDIT EFFECT]

An Owner should not be imprisoned or detained if their conduct did not involve criminal force and poses no danger to others. For example, the inability to pay a fine is a financial failure, not a criminal act. The request is not binding to the organization.

Relationship: National Government & Regional Authority & Local Government & Law Enforcement & *Security*

34. Safeguard Against Unjustified Surveillance [AUDIT EFFECT]

Data collection and storage for Owners who are not suspected of a crime is restricted. Owners may object to mass surveillance and request transparency regarding what data has been captured and stored.

Relationship: All State-Related Organizations & Law Enforcement & Security & Monopolies & Non-Business Entities & Business Entities.

35. The Right to Surveillance Warnings [AUDIT EFFECT]

The Organization should require that electronic products and software services carry a clear, visible warning wherever they perform or enable surveillance or manipulation, delivered at the point of purchase or activation — package, invoice, checkout screen, confirmation email, or first-run setup — rather than only within long legal terms or documentation. The warning discloses behaviour and Owner control options; it does not restrict what a product may do.

Relationship: National Government

36. Safeguard Against Emergency Overreach [STOP CONDITION]

History shows that crisis regimes ("rule by decree") are sometimes misused to expand power, prolong emergencies, or cover up poor governance or manipulation; therefore, this right functions as a **risk-minimization safeguard**, not a punishment. Owners may demand dismissal of leaders who rule by decree beyond defined limits and require an immunity-free accountability window before returning to protected office.

Relationship: National Government

37. Right to Name the State Form [STOP CONDITION]

Owners have the right to assess and categorize the state's form (e.g., Democracy, Dictatorship, Fascist) based on objective indicators without facing retaliation. It is the Owner who evaluates the organization, not the reverse.

Relationship: National Government

38. Voter Approval for Border Changes [AUDIT EFFECT]

Owners may audit whether any annexation or separation of territory was authorized in advance by public vote, with the mandate secured at least 1 year before the change takes effect. A change made without such a mandate, or sooner, is recorded as non-compliant, and a vote held afterwards does not cure the finding. This is an authorization benchmark; it does not stop or reverse any change.

Relationship: National Government

39. Compensation Benchmark Transparency Safeguard [AUDIT EFFECT]

Owners may request disclosure of the compensation paid to employees and office-holders in high-stakes positions, and of the benchmark used to set it. Compensation should be set against a published, population-scaled benchmark rather than by internal discretion, so that pay is neither structurally uncompetitive nor politically improvised. Disclosure does not oblige the Organization to adjust any salary.

Relationship: All State-Related Organizations
